

INTRACOM

Now you can easily, simply & quickly connect or extend intercom or IFB stations to:

- Another control room (local or distant)
- Offices anywhere
- ENG /SAT trucks
- Transmitter sites
- Locations crews
- Inter Continental IFB w/ fractional delay time
- Any laptop w/internet service
- Mobile production offices
 - Moving vehicles
 - Stage or Field

Control Panel GUI

The VCOM Control Panel software replicates the layout of a hardware intercom panel with buttons for ISO and Party Line talk/listen circuits as well as IFB address.

Buttons can also be:

- program monitor (from audio in);
- VOG /Stage Announce (audio out);
- phone line (dial out or answer inbound call);
 - 2-Way radio (including talk key);
- GPIO control by /over other equipment (ie: call light, Tx key, start/stop. etc.)

Mini-PC
7" touch LCD
panel available

Ultra-Mobile PC
w/ Touch Screen

VCom can easily bridge hardware intercoms from any manufacturer

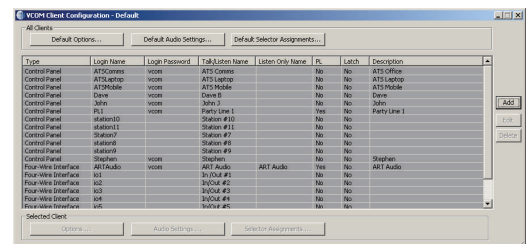

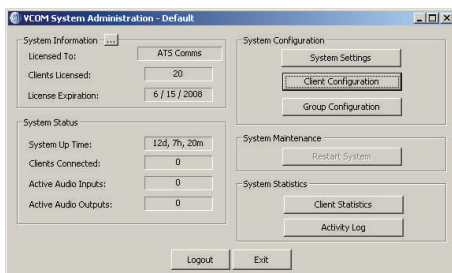

Any intranet or internet connected Desktop, Laptop (or MAC w/ Bootcamp) or Pocket PC anywhere in the world can access a VCOM matrix for reliable intercom & IFB communications. Any VCOM computer on the network can have a 4-Wire interface accessible from any other Vcom computer.

Administration software controls and monitors a VCOM matrix from anywhere
