

## VCOM Wireless Intercom

VCOM Wireless Intercom brings the richness of ProCom functionality to WiFi and data cellular enabled Handhelds running Microsoft Windows Mobile 5.0 and above. Leverage the VCOM Control Panel for Mobile to add mobile clients to an existing VCOM System or use as a stand alone wireless intercom system as powerful, highly interoperable substitute to proprietary hardware based wireless intercom systems and two-way radios.

VCOM Wireless Intercom offers:

- Unprecedented wireless intercom functionality
- Turn-key deployment
- Significant cost savings over proprietary hardware
- No radio frequency restraints

Key Features:

- Supports up to 200 users that can talk hands free privately or in conference in full duplex
- Virtually unlimited channels configurable for point to-points, group calls, and party lines
- Use in push-to-talk or push-to-enable mode
- Individual channel volume controls
- Ability to unlatch users
- Integrated phone interface with dial pad
- Readily interfaces with virtually any number of external communications systems
- Only 40kbps bandwidth required per user
